Ke°

HypoX®

On-Site Brine
ElectroChlorination
Technology

series LX

Custom Capacity & Config.

Clearly the Most Advanced Brine Electro-Chlorination Plant

Fully Customizable equipments and their spare configurations

Separated Dry and Wet Areas eliminates corrosion effect for electrical parts and provide separated personel authorisation areas

Cross Operation Design allows to use any spare unit in any combination hence maximizing the plant run time %

Modular Unit Design for maximum accessibility and easy of maintenance

360º Transparent Cell Design ensures on time and complete acid cleaning maintenance

Explosion Protection Engineering Document (EPD) according to IECx standards proofs how we design Hydrogen-Safe electrolysis process

Fully Integrated, Circular Cell Cleaning with smart and step-by- step PLC guidance supplies much safer&easier operation when compared with Mobile units

Titanium Centrifugal Dosing Pumps for life-long, problem-free and low-maintenance dosing unit

Lifetime Guaranteed Brine Dosing with no pumps brings life-long, problem-free and maintenance-free brine dosing

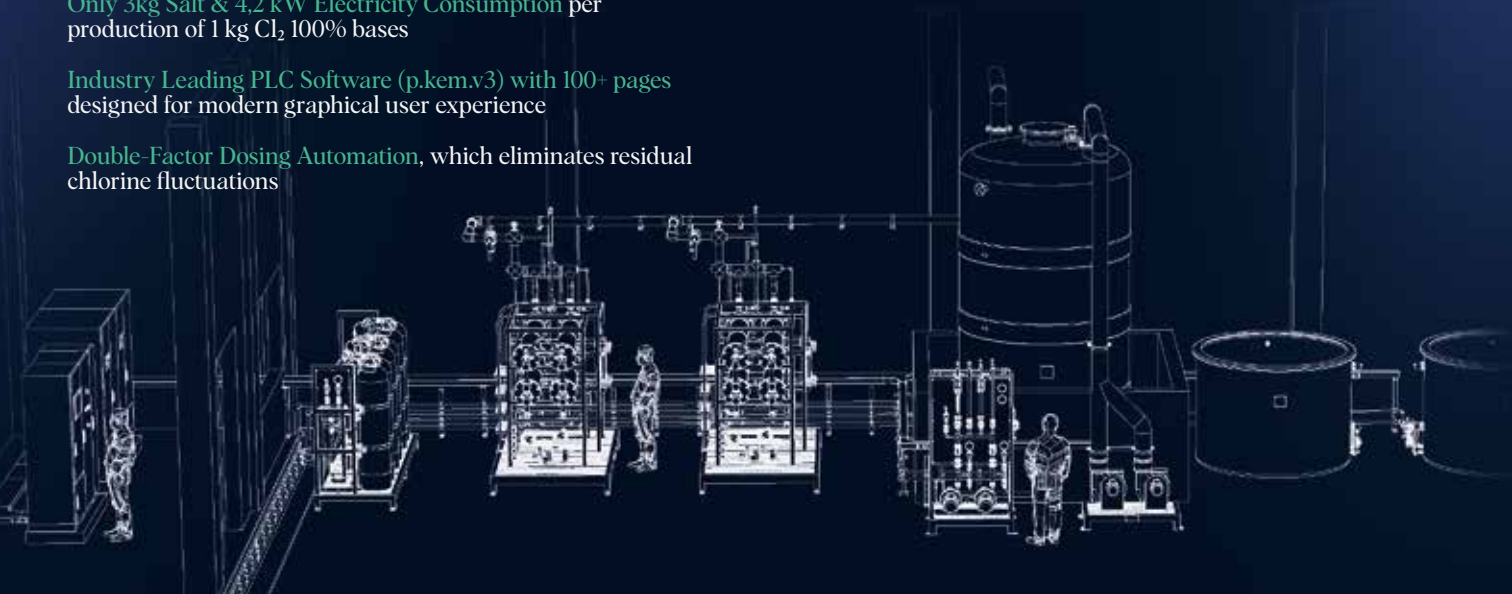

Problem-Free and Long-Lived Mechanical Water Softeners from Kinetico

Completely Stainless Steel Construction for lifelong corrosion protection

Only 3kg Salt & 4,2 kW Electricity Consumption per production of 1 kg Cl_2 100% bases

Industry Leading PLC Software (p.kem.v3) with 100+ pages designed for modern graphical user experience

Double-Factor Dosing Automation, which eliminates residual chlorine fluctuations

Unique Placed Skid Design in a small footprint with high industrial standards

Easy Installation with Plug & Play start-up even in large capacities thanks to pre-installed and factory tested skid structure

360º Transparent Cell Design ensures on time and complete acid cleaning maintenance

Explosion Protection Engineering Document (EPD) according to IECx standards proofs how we design Hydrogen-Safe electrolysis process

Fully Integrated, Circular Acid Cleaning with smart and step-by-step PLC guidance supplies much safer&easier operation when compared with Mobile versions

Titanium Centrifugal Dosing Pumps for life-long, problem-free and low-maintenance dosing unit

Lifetime Guaranteed Brine Dosing with no pumps brings life-long, problem-free and maintenance-free brine dosing

Problem-Free and Long-Lived Mechanical Water Softeners from Kinetico

Completely Stainless Steel Construction for lifelong corrosion protection

Only 3kg Salt and 4,2 kW Electricity Consumption per production of 1 kg Cl_2 100% bases

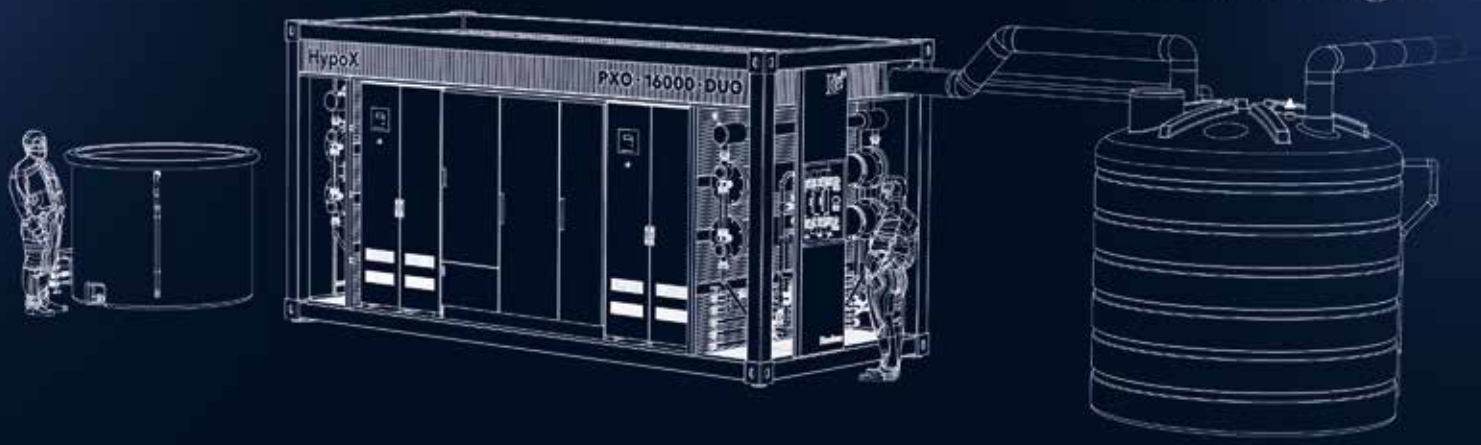

Industry Leading PLC Software (p.kem.v3) with 100+ pages designed for modern graphical user experience

Double Factor Dosing Automation by PLC, which eliminates any residual chlorine fluctuations

series PX

2000 - 32000 gr/h

High Industrial Standards On a Small Footprint with Unique, Plug & Play Skid Design

Electrolyze the Future

series MX

600 & 1200 gr/h

Answers Industrial Needs in Small Capacities within its compact skid design

Options available for both Manual or PLC based control according to features requested

360º Transparent Cell Design ensures on time and complete acid cleaning maintenance

Integrated Passive Cell Cleaning. No-Mobile!

Lifetime Guaranteed Brine Dosing with no pumps brings life-long, problem-free and maintenance-free brine dosing

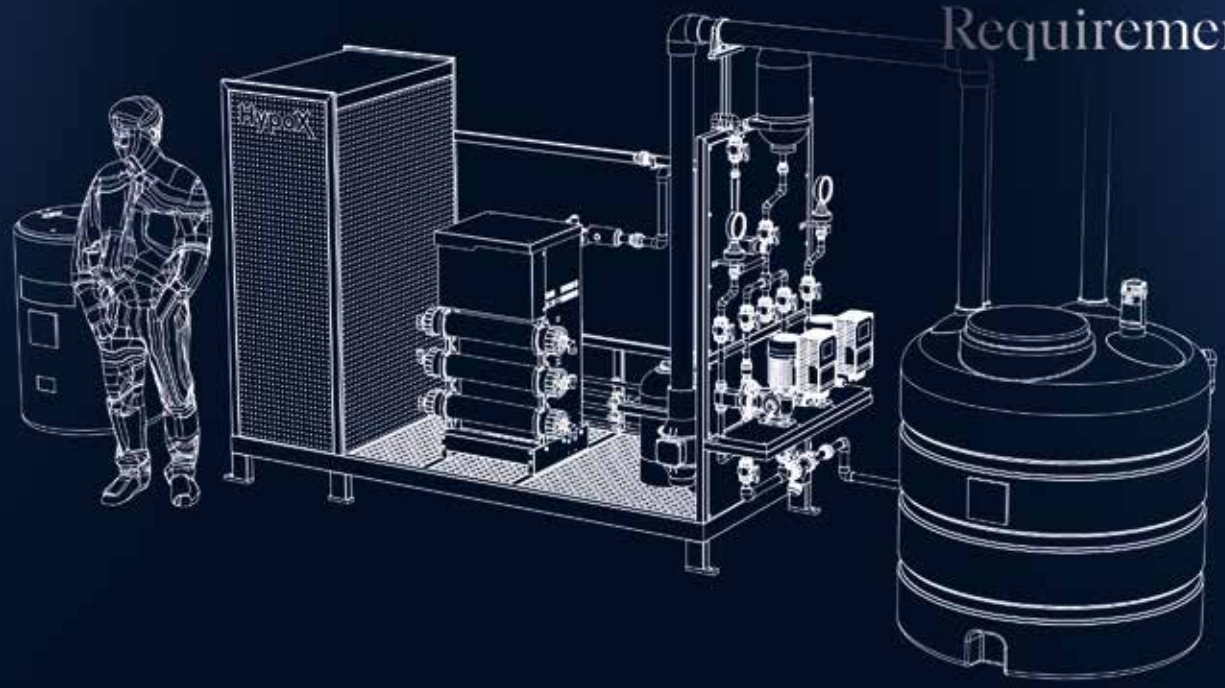

Problem-Free and Long-Lived Mechanical Water Softeners from Kinetico

Completely Stainless Steel Construction for lifelong corrosion protection

Only 3,5kg Salt and 4,5 kW Electricity Consumption per production of 1 kg Cl_2 100% bases.

Double Factor Dosing Automation by PLC, which eliminates any residual chlorine fluctuations

Compact Design Meets with Industrial Requirements

All In One Skid Design Including Tanks allows Plug & Play start-up

Manual Operation for simplified and small capacity requirements

360º Transparent Cell Design ensures on time and complete acid cleaning maintenance

Lifetime Guaranteed Brine Dosing with no pumps brings life-long, problem-free and maintenance-free brine dosing

Problem-Free and Long-Lived Mechanical Type Water Softeners from Kinetico

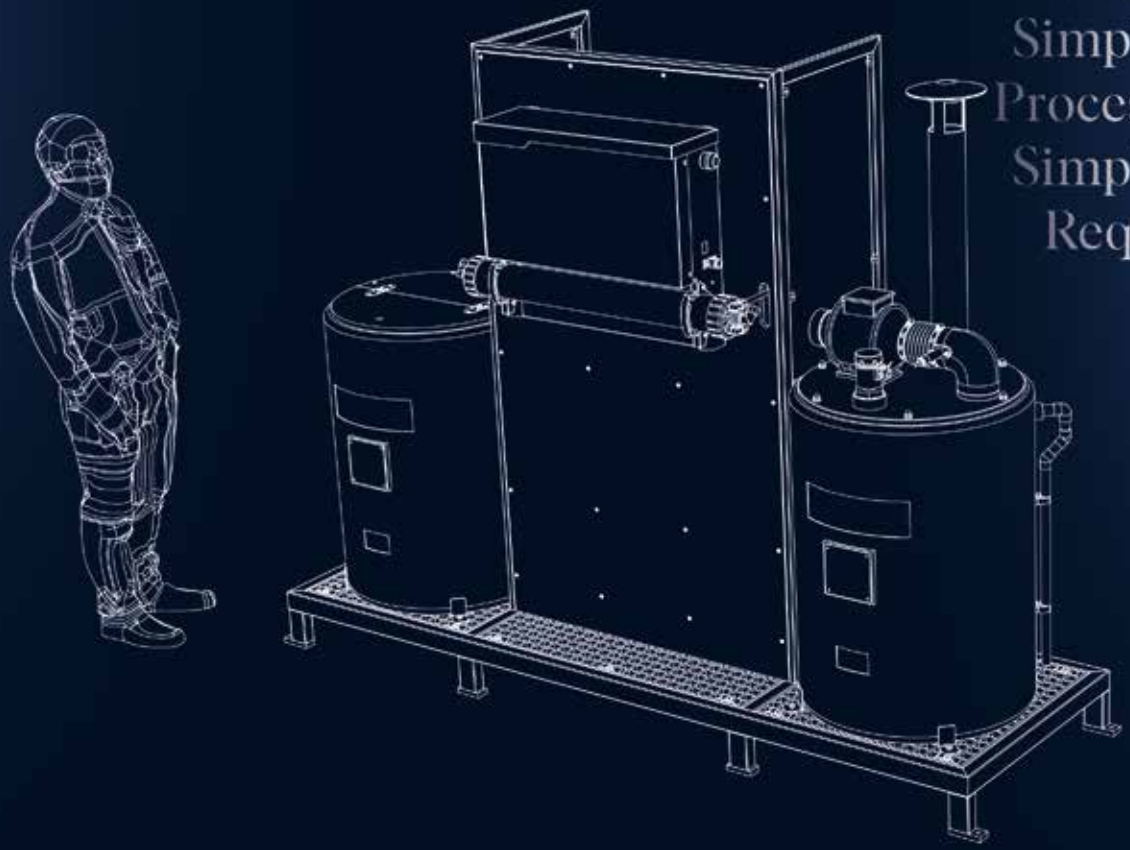

Fully Stainless Steel Construction for lifelong corrosion protection

Only 3,5kg Salt and 4,5 kW Electricity Consumption per production of 1 kg Cl_2 100% bases

series TX

300 gr/h

All in One Skid with Simplified Process for Simplified Requests
